

Flashcards

- . Inside every Lecture we need its own flashcards
- . The Flashcards would made by me " Admin " and publish on server
 - . The Flashcards would include text and photos
 - . We need progress bar for the flashcards
- . The User opens his account wherever and finds his progress
- . Card would include the question on its face and on the back the answer and there is a button to save the flashcards that user didn't know " Know - Don't Know Button "
- . When the user open the deck he finds all the flashcards in a list and it requires to press start to begin
 - . The answer would appear by just tab on the card
 - . Shuffle button required to shuffle the cards
- . It's not important to facilitate for admin uploading them i will handle it however
- . User can delete the flashcard he doesn't need but can't edit them
 - . It's not important to protect them taking screenshot
 - . Card must be on the fullscreen mode
 - . No Search bar needed for them
 - . Offline mode needed

Interactive MCQs

- . Inside every Lecture we need its own MCQs
- . The MCQs would made by me " Admin " and publish on server
 - . The MCQs would include text only
 - . We need progress bar for the Mcqs while solving
 - . Saving Progress in the account is not needed
- . Simply the question display and 4 choices , when the user choose the right answer correct appears and when he choose the wrong one wrong appears and correct answer appears
 - . No grades are needed at the end
 - . user can't edit or delete the questions
 - . offline mode is not required
 - . Next - previous buttons needed
 - . No timer
 - . Green for Correct and Red for False

External Note Addition

- . User can write and erase - highlight - add photos to the pdf
- . The added notes the user add only for the user
- . The user can find his notes locally offline on the device he uses only
 - . Highlight only in yellow
 - No Underline - Strikethrough needed
 - No comments needed
 - No sticky notes needed
 - No arrows - circles needed
